Read:- Government of Gujarat, Road & Building Department, Sachivalaya, Gandhinagar Circular No. SOR/1085/7/H(1) dated 08/12/1986

CIRCULAR

The uniform rate of cement consumption for various item was prepared and circulated vide No. SOR/1085/7/H(1) dated 08/12/1986.

At the outset, current practice of estimating cement consumption in concrete item of various Building, Bridge and Road project is based on above circular. However, it is generally observed that the cement consumption derived by actual mix design is lower than the standard cement consumption. Some of provision of the said circular become obsolete due to subsequent revisions in the relevant IS code and IRC code. The maximum cement consumption as per IS : 456-2000 and IRC : 112-2011 is 450 Kg./m³ . Also cement industry and aggregate crushing industry have involved better quality of cement and aggregate over the years which have far reacting impact on mix design of the present day concrete.

Mix design report of GERI reflecting entire Gujarat region have been considered in averaging the cement consumption in various grade of design mix concrete. To minimize the difference between standard cement consumption of cement and actual consumption derived by mix design by GERI and the cement consumption as per provision of IS and IRC code falling cement consumption is proposed for estimation purpose.

Looking the above facts, the cement consumption mentioned in circular vide No. SOR/1085/7/H(1) dated 08/12/1986 is required to modify as per below:

| EXISTING ITEM | | | AMENDMENT | | |
