To,

The Superintending Engineer

PGVCL, Circle Office,

Rajkot(R)/ Rajkot (City)/Morbi/ Bhavnagar / Jamnagar/ Junagadh/

Porbandar/Bhuj/Anjar/Botad/Surendranagar/Amreli

Sub: Utilization of Pole Erection Device (PED machine) for erection of all Poles.

The erection and maintenance work of HT /LT lines and Transformer centers are carried out by various contractors. For that Annual Work orders are issued to Contractors as per PGVCL's Tender Terms and conditions by Division offices. Erection of poles is one of the key activities for stringing of HT Lines, LT lines, erection of DP structure, and erection of Transformer Center etc.

During the meeting held under the chairmanship of the Director (Tech) GUVNL, on Dt.24.06.22, it was emphasized upon the quality of work in pole erection.

In order to ensure the quality in erection of poles, in scheme works it is decided that the pits should be digged by using the Pole Erection Device (PED machine). Wherever, it is not possible to use the PED machine in the area like hard rock, small street etc. the permission of the Engineer In charge shall be taken for digging of pits as per the conventional method.

The existing Contractors should be made aware for using the PED machine and benefit thereof for quality of work. Further in the new tenders, which will be floated by concerned office now onwards, a condition should be mentioned to use PED machine for digging of pits and erection of poles.

It is requested to pass on necessary instruction to the Divisional head in this regard from your level.

I/C Chief Engineer (Project)
