

Flocculant**Chemical characterization**

: Anionic Poly Acrylamide

Physical and Chemical Properties

: Colour – White,
Form- Granular Solid
Ph (1% Solution) - 7to 7.3
Odour-None

Water Solubility

: Viscous Solution with Water

Stability

: Stable at Ambient Temperature

Bulk Density

: 0.75 gm/cc

Particle Size

: 85% Less than 1000 Microns

Packing

: Supply in 25 Kgs Net Plastic Bags, shrink
rapped into a pallet suitable for safe transportation.
MSDS Must be submitted along with tender DOC.

Preferred Brands

- : i) Magnafloc -155
ii) Ultrafloc -6000G
iii) DK Set DHA -1157
iv) Aquafloc / Quicksol
