NOTE :

Sarhad Dairy reserve the right to select any of the manufacturers from above list and to add/delete names of the other parties as and when required.

Responsibilities of the Contractor:

1. The contractor shall carry out all the works as per latest revisions of relevant IS codes for materials, equipment, code of practice, work safety and measurement as well as the requirements laid down by the state, city or other government bodies.
2. The contractor shall carry out necessary material grading and storage as per specifications, instructions and good engineering practice.
3. Contractor shall at all time maintain reasonably sufficient, qualified and experienced workmen and supervisory staff at site and the site in charge shall be authorized to represent the contractor fully.
4. The contractor shall deploy and maintain sufficient and necessary tools/tackles and plants / equipment in proper operating condition at the site. A list of all such facilities would be submitted to the owner before starting the work at site.
5. The contractor shall plan the work on basic guideline of the consultant / owner.
6. Contractor to ensure schedule. If at any given moment of project completion time if the owner feel that the rate of progress of contractor is not sufficient to complete work in schedule time and for which no sufficient and reasonable ground for extension of time exists, contractor would make up for such loss time by increasing his resources sufficiently and or by additional working hours including increase in working hours and working on weekly and other holidays. However no compensation shall be payable towards any additional expenses incurred by contractor for restoring to such remedial measures. In the event that contractor fail to make up such lost time even after a sufficient written notice from owner/ consultant, the owner shall have option of taking away a part or whole of this contract and award it to other agency. The additional financial burden on the owner while resorting to such measures would be entirely to the contractor 's account and such money would be recovered from contractor 's dues, security deposits or any other money payable to contractor towards contract.

7. The contractor shall arrange for testing the works as per relevant IS codes / instructions of the consultants and carry out the testing as per relevant IS codes instructions of the consultants / from approved laboratories and submit the reports of the same to the consultant and owner for approval.
8. Within 10 days of completion of the work, the site shall be cleaned of all scrap, temporary works, materials etc. and site would be left as clean as possible.
9. The contractor shall carry out all the work with utmost regard to safety. The work place shall be well lighted during dark hours of work. Proper and secured scaffolding shall be provided for the elevated jobs etc.
10. The owner shall be consistently provided with water and electricity by the owner at free of cost at one point at the site and the contractor shall provide backup water and electrical supply to the work place.
11. The contractor shall ensure that all his personnel (staff and workforce) are covered by suitable workmen compensation policies at his own cost. The copy of such policy shall be submitted to the owner before commencing the work. All the contractor's tool and plants and temporary construction facilities would be also insured with an all risk comprehensive policies.
12. The contractor shall provide to the owner a certificate stating that all materials brought to the site by the contractor are sales tax paid and the owner would consider no reimbursement of tax.
13. Contractor's rate for works includes preparing, placing, cutting, bending, welding, erecting, fixing and testing of components at all shapes and heights.
14. The contractor shall submit site organization chart and detailed bar chart at the time of signing the agreement.
15. The contractor have to maintain the measurement sheet/book regularly. every bill must be submitted along with the measurement sheet/book. Bill must be approved from sarhad dairy engineer.
16. The contractor must have to complete the work job as per given timeline.
17. The contractor have to work during the plant is running so not to disturb the other activities of plant.
18. The contractor shall ensure that damage will not occur during the work and if during the work damage something then contractor will have to repair that damage as like as before with quality.
19. The Contractor must ensure that the using material in the work is as per approved make list, size – specification, line and level must have to follow as per drawing and BOQ.

General:

- 1 The contractor agrees and guarantees that the plants supplied by him will constitute the complete fabrication and piping work and shall confirm the drawings and specifications set out herein.
- 2 The contractor shall make modifications in the process or scope of the job at the request of the owner.
- 3 The owner reserves the right to cancel this contract, if he finds that the contractor is obstructing the execution of the project. However in such an event section 14 “ Premature Termination “ of this contract shall apply.
- 4 The contractor shall make his own arrangements at his own cost for lodging, boarding, expenses for safety measures, Expenses for the care of the plant/ machinery/ equipment, third party insurance, other required insurance as well as compensations for damages and accidents.
- 5 The contractor shall fulfill all his obligations under the law of the land including compliance with statutory requirements of Government(s).
- 6 The owner may ask the contractor to procure materials at the rates mentioned in the Annexure 1 and 2. The payment for the materials shall be made within seven days of the receipt of the material at owner’s site. However the advance for the material procurement shall be given against the bank guaranty of equal amount from any scheduled bank in the format prescribed by the owner.

Instructions to bidder:

- a. Tender documents issued to each bidder comprises tender notice, Tender, Form of agreement, Bill of Quantities / Abstract sheet and Tender Drawings for the above mentioned work.
- b. Tender shall be filled in, signed with all particulars complete and submitted by one duly authorized to do so. The bidder shall satisfy the owner that he is competent and authorized to submit the tender and/or to enter into a legally binding a contract with the owner by furnishing documentary evidence in that behalf.
