

14. MOU / Agreement with the OEM permitting supply/manufacture of the offered springs. (For proposals from other than OEMS).
  15. A write-up giving broadly the maintenance requirements on a time/distance basis along with the facilities that would be needed for proper maintenance/upkeep of the offered air spring assembly. It may be noted that maintenance schedules recommended for air spring assemblies should coincide with the specified various maintenance schedules of the respective coach.
  16. A detailed write-up giving the details of "Quality Assurance System" being followed for manufacture of the offered items; and
  17. Details of manufacturing and testing facilities available with the manufacturer.
- 7.2 Vendor applying for registration shall submit strength calculation & simulation for top plate, bottom plate and rubber components of the air spring assembly during the submission of offer.
  - 7.3 The information received above shall be used for preliminary evaluation of the firm's capability in meeting with the requirements of this Specification.
  - 7.4 The firm shall be required to submit a Type Test Report of a proposed design after the preliminary evaluation carried out as per para 7.3 is found satisfactory. Type Test Report shall be complying with Annexure "A" of this Specification.
  - 7.5 The premises of the firm shall be visited by RDSO's officials for on-the-spot assessment of the firm's capability.
  - 7.6 RDSO reserves complete right in granting approval or otherwise to a firm.
8. **GUARANTEE:**
- 8.1 Complete air spring assembly including emergency spring shall be guaranteed for satisfactory performance for a minimum period of 60 months from the date of actual commission in bogies or 72 months from the date of supply whichever is earlier. Satisfactory performance for this purpose means that complete air spring assembly or any of its part shall neither show any kind of deterioration which is likely to render it unserviceable nor lose its characteristics as stipulated in this Specification, during the guarantee period for reasons attributable to manufacturing/design defects.
  - 8.2 In the event of 'non-satisfactory performance' of any of the items as indicated above, supplier will have to replace the same at his own expense without levying any cost involved in transportation, handling and replacement of such items on the Purchaser.
- 9 **INSTALLATION, COMMISSIONING & MAINTENANCE:**
- 9.1 On placement of order, supplier whose equipment will be purchased for the "First Time" for installation on the coaches, shall have to depute his representative at his own expense to associate with the purchaser in installation and commissioning of the equipment on the first five coaches. He shall also depute to his representative during maintenance schedules undertaken on his equipment as per maintenance booklet supplied by him.
