L. NO. M-400/MCF/RBL/Fur/B08

DATE 20.01.2026

Dy.CMM/Fur
MCF/RBL

Subject: Implementation of RCF CAI for LHB type coaches for 110 V DC +ve and -ve wire segregation in Lavatory wiring for all LHB variants of Lavatory Modules.

Reference: Dy.CME/Design-II letter no. RBL-MD46118 Vol-I Dated 12-01-2026.

Vide letter reference to above; the Design Wing has advised implementation of RCF CAI No. ED/CAI/033 dated 02.04.2024 (or the latest revision) for proper segregation of 110 V DC positive and negative wiring in the lavatory modules of all LHB variants.

In view of the above, the Stores Department is requested to advise all the firms supplying lavatory modules to ensure that 110 V DC +ve and -ve wires are provided separately, as per the advised CAI, for all LHB variants, both for existing MCF purchase orders and subsequent supplies. The Suppliers of lavatory modules should also be advised to submit detailed Electrical wiring drawings for the lavatory modules to design wing.
