If technical specification prescribes any condition involving financial repercussion, which is in

conflict with IRS conditions of contract, SR tender Conditions for electronic tenders and Special Conditions specified in the tender document of IREPS (except warranty/guarantee period), then same will be ignored for tender evaluation purpose unless made a special condition of tender.

PART-B TENDER CONDITIONS

1.0 Validity of offers: The tenderers are requested to keep the validity of their offers open for a minimum period of 90 days or as stipulated in the tender. However the administration reserves the right to consider offers with lesser validity period, in case the said firm(s) is / are willing to extend, if so required, validity of their offers for 90 days or as stipulated in the tender.

Offer(s) of tenderer(s) not willing to extend the validity as stated above will be rejected and such tenderer(s) will not have any claim for consideration of their offer(s).

2.0 Quantity to be ordered :

2.1 The Principal Chief Materials Manager / Southern Railway acting on behalf of the President of India is not bound to accept the lowest or any tender, nor to assign any reason for not doing so and reserve to himself the right to accept any tender in respect of the whole or any portion of the items specified in the tender and contractor shall be required to supply at the rate quoted / accepted.

2.2 Railway reserves the right to cancel the tender in whole or order either for full or part quantity tendered without assigning any reason. The rates quoted by the Tenderers for full tendered quantity would be taken as valid for part quantity also.

2.3 Railway also reserve the right to order the tendered quantity or part thereof on an existing contract by operating quantity option clause at lower rates (if available) than the rates quoted in this tender.

2.4 Option Clause:- (Applicable for tenders wherever specifically mentioned in the tender conditions as applicable) :-The purchaser reserves the right to increase the order quantity

by a quantity not exceeding 30% of the ordered quantity on the same price and terms and conditions during the currency of the contract by giving reasonable time / notice for executing such increase to the contractor.

2.5.1 Option Clause can be exercised anytime within the Delivery period, by giving reasonable notice

2.5.2 'Reasonable notice' as mentioned above is only for the purpose of allowing the contractor suitable time to make necessary arrangements for the supplies and not for seeking any consent from the contractor towards exercise of the contractual option clause. To this end, a reasonable delivery schedule for the enhanced ordered quantity stipulated in the relevant Modification Advice to the contract will suffice

2.6 In a contract that provides for quantity option clause, in case Delivery Period is extended either for the full ordered quantity or a part quantity which remained unsupplied on the date of expiry of the original delivery period, then during the extended delivery period also, quantity variations can be made on the total ordered quantities.

3.0 Eligibility Criteria :

3.1 Ordering on Approved Sources : Railway procure some of the items from approved sources. Approved vendors of RDSO, CLW, BLW, RCF, ICF, MCF and CORE as available on UVAM only shall be considered valid directories for all purposes by all Stakeholders. Granting of Approval is a continuous ongoing activity, therefore vendor list can undergo changes after opening of tender . The approval status of the firm shall be reckoned as on the date of tender opening and not thereafter. But in case of downgrading /removal / suspension / banning etc after opening of the Tender, such changes will be taken into account while deciding tenders. This however does not apply for placing small quantity contracts on new sources, as their capacity & capability will only be ascertained before placement of developmental order.

3.2 Ordering on Approved Vendors: Wherever there is a restriction policy to procure the item from approved sources, the same will be followed as under:

3.2.1 It may specifically be noted that approval of a vendor only signifies its technical capability to supply the items for which it has been approved / registered and it is quite likely that such vendors differ in terms of capacity, past performance etc. The quantity to be ordered on approved sources, therefore, will be decided duly considering factors such as past performance, capacity, delivery requirements, quantity under procurement, nature of items and outstanding order load etc. and the tender conditions in fair transparent and equitable manner.

3.2.2 Wherever necessary, as per policy of procurement, bulk purchase will be made only from those firms who have been approved by RDSO / Productions Units / CORE etc. Vendors participating in tender shall have such approvals before opening of tender for the items tendered to manufacture and supply the same. The tenderers should attach scanned copies of such approval letters and approved QAP, along with their e-offers.

3.2.3 Minimum 80% of the net procurement quantity (NPQ) shall be ordered on “Approved Vendors”

3.2.4 It is clarified that approved and registered are one and same for the items approved by the nodal agencies such as RDSO / PUs / CORE etc.

3.2.5 It is clarified that Railway units, other than the concerned nominated vendor approving agencies, are permitted only to place orders either on developmental vendors or approved vendors, for the items which are restricted to be procured from vendors listed on UVAM. No orders can be placed by Railway units, other than nominated vendor approving agencies, on vendors who are not “Developmental Vendors”. or “Approved Vendors”. For clarity, it is re-iterated that “Developmental Vendors” are only such vendors which are listed as developmental vendors on UVAM without any condition.

3.3 Ordering on new / developmental sources :

- (a) If the tendering firm (s) is not approved by RDSO/PUs/CORE, then they must submit their credentials details i.e Machinery and Plant, Testing Facilities, QAP, Technical Manpower

etc. to evaluate their capacity cum capability. Failure to furnish requisite credentials details will make their offer liable to be ignored.

(b) The Tenderers to specifically note that there is no policy of placing bulk orders on developmental sources for restricted items, even though firm might have been approved as source under development.

(c) **When the vendor approving / registering agency grades vendors only as registered / approved vendors:**

The Developmental order can be given upto 20% of the NPQ on unregistered / untried firms about whom Railway is prima facie satisfied that they are capable of executing the order. This 20% quantity will be within the NPQ. However, there may be some cases of procurement of materials where Railways may not be willing to undertake the risk of the failure on the part of the supplier on whom the developmental orders have been placed. In such cases, Railway may go in for increased purchase quantity in consultation with Finance and keeping in view budgetary and other aspects so that 100 percent order could be placed on registered / approved suppliers and quantity not more than 20% of NPQ could be placed as a developmental order outside the NPQ

(d) Where there are not more than three Indian Suppliers categorized as Approved Vendor for a particular item, developmental vendors can be considered for placement of bulk order without any quantity restrictions. However, while considering such vendors, factors including past performance, capacity, delivery requirements, quantity under procurement, nature of item, outstanding order load, etc. shall be considered in a transparent manner, subject to rates being reasonable. Quantity allocation among eligible vendors shall be based on pre decided tender criteria. Such orders shall be treated as bulk orders

3.4. Procurement from (OEM's) manufacturers or authorized agent / dealers:

OEMs can authorize and give Tender Specific Authorization to its Agent / dealers to quote on their behalf provided the vendor takes full responsibility for the quality of the material including warranty obligation and the inspection of product against Railway's order is carried out at the manufacturer's premises.

3.4.1 (a)(i) In a tender, either the Indian agent on behalf of the Principal/OEM or Principal/OEM itself can bid but both cannot bid simultaneously for the same item/Product in the same tender.

ii) In a tender, if Indian agent on behalf of the Principal/OEM or Principal/OEM bids simultaneously for the same item/product in the same Tender, then both the offers will be considered ineligible and will be summarily rejected.

(b)(i) If an agent submits bid on behalf of the Principal/OEM, the same agent shall not submit a bid on behalf of another Principal/OEM in the same tender for the same item/product.

(ii) If an agent submits bids on behalf of the Principal/OEM and also on behalf of another Principal/OEM in the same tender for the same item/Product, then Both offers will be considered ineligible and will be summarily rejected.

(c) In view of the above, Manufacturer may note that an agent can represent only one firm in a tender and any manufacture cannot submit more than one offer Against a tender through different sole selling agents or one offer directly and Other offers through sole selling agents, in other words, in a tender, either the Indian agent on behalf of the Principle/OEM or Principal/OEM itself can bid but both cannot bid simultaneously for the same items/product in the same tender. In such a situation all the offers will be rejected. Also a “100% Indian Subsidiary” of the foreign firm cannot bid through another agent. The Relation between the Principal/OEM & Agent or Indian Subsidiary(100% or Otherwise) should be contractually established and clear.

(d) The above conditions shall apply for all types of Tenders.

3.4.2 “In case of imported goods, where the agent directly imports the goods in its own name or by the OEM on whom the order is placed, the submission of copies of import documents (Bill of Entry) is mandatory and the same should accompany the supplies.”

3.5 Acceptance of Offers from unregistered and untried firms through advertised tenders :

3.5.1 Where the tendered item is not covered by restrictive procurement policy from approved sources, all unapproved, unregistered and untried firms should furnish along with their quotation the following :

- a) The performance statement in the prescribed pro forma given in e-tender regarding supplies made by them against contracts received from other Railways, DGS&D and other agencies for similar stores in the past 3 years.
- b) Details of equipment they possess for manufacture of the tendered item including quality control.
- c) Details of technical manpower employed.
- d) The name and full address of their Bankers and Income Tax PAN number.
- e) ISO 9000 / 14000 / 18000 certificates, whichever is applicable.
- f) Details of EMD paid and willingness to pay SD

3.5.2 At least 80 percent of the procurable quantity will be covered invariably on the registered / approved suppliers. The balance quantity up to 20 percent could be covered on the unregistered firms whose capacity could not be tried by an educational order earlier but whose offers are competitive and prima facie the Railway is satisfied that they are capable of executing the order.

3.5.3. There may also be some cases where the Administration may consider after due verification that the new supplier who has quoted competitive rate is having the required capacity-cum- capability and in those cases the Railway Administration may place bulk orders on these suppliers straightaway.

3.6 Consideration of unsolicited offers against Limited / Bulletin tender enquiries :

3.6.1 Unsolicited offers received against Limited Tender enquiries and offers from the firms against Bulletin tender enquiries for which they are not registered with the Railways for the tendered items, will normally be ignored. However, Railway reserves the right to consider such offers under exceptional circumstances, where it is felt necessary to consider such offers, on account of - inadequate competition, non-availability of suitable quotation from registered suppliers, urgent demands, capacity / capability of the firm offering to supply the relevant item being known and rates received are reasonable etc.

3.7 Time Preference Orders :

3.7.1 In cases where it is decided to accept a higher price than the lowest tender in consideration / interest of earlier delivery, passing over the lowest acceptable offer , following conditions will apply :

“It should be noted that if a contract is placed on a higher tenderer as a result of this invitation of this tender, in preference to the lowest acceptable offer, in consideration of offer of earlier delivery, the contractor will be liable to pay to the Government the difference between the contract rate and that of the lowest acceptable tenderer on the basis of final price, FOR destination including all elements of freight, sales tax, local taxes, duties and other incidentals in case of failure to complete supplies in terms of such contract within the date of delivery specified in the tender and incorporated in the contract. This is in addition and without prejudice to other rights under the terms of Contract.”

4.0 Cartel formation by approved vendors : The tenderers are expected to quote rates which are most competitive and reasonable, commensurate with market trend in fair competition.

- 4.1** Wherever all or most of the approved firms quote equal rates and cartel formation is suspected, Railways reserve the right to place order on one or more firms with exclusion of the rest without assigning any reasons thereof.
- 4.2** Firms are expected to quote for a quantity not less than 50% of tendered quantity. Offers for quantity less than 50% of tendered quantity will be considered unresponsive and liable to be rejected in case cartel formation is suspected. Railways, however reserve the right to order any quantity on one or more firms.
- 4.3** The firms who quote in cartel may note that their names are likely to be deleted from approved list.
- 4.4** The present policy of distribution of ordering quantities on approved sources and new sources, based on the status of approval obtaining on the date of tender opening will be followed in normal circumstances. However in tenders, where cartel formation is suspected, the purchaser will be free to distribute the ordering quantities in any manner deemed fit in the interest of the administration ignoring the status of approval.
- 4.5** In the event of the offers conforming to any aspect of the definition of cartel mentioned in “The Competition Act 2002 (12 of 2003)”, in addition to the existing remedies, the purchaser also reserves the right to refer the matter to the Competition Commission of India (CCI), which is a statutory body constituted under “The Competition Act 2002 (12 of 2003)”, for providing necessary relief to the Purchaser who represent Central Government organization serving the public. In addition, the purchaser also draws attention of the tenderers to Chapter VI of the “The Competition Act 2002 (12 of 2003)” which deals with Penalties. This will be in addition to other rights and remedies available to the Railway Administration under the Contract and Law.
- 4.6** Whenever tender is floated with purchase restriction from sources approved by nominated authorities and there exists a suspected cartel situation by approved sources or the rates available from approved source/sources are adjudged unreasonably high, despite fair efforts as permissible, the purchaser reserves the right to place orders on firms outside the approved vendors list, without any restrictions.

5.0 Splitting of tendered quantity:

5.1 Case of no prior decision to split the order:

Normally full order should be placed on the L1 firm. However, if after due processing it is discovered that the quantity to be ordered is more than what L1 alone is capable of supplying and there was no prior decision to split the quantities then this aspect should be recorded in TC Minutes/Acceptance in direct acceptance cases. The quantity being finally ordered will be distributed among the other contractor in a manner that will be fair, transparent and equitable manner with a specific note of past performance, capacity, delivery requirements, quantity to be procured, nature of the items and outstanding order load etc.

5.2 Case for pre-decided split ordering:

It has to be decided in advance to have more than one source of supply on account of delivery requirements in tender, past performance and capacity, quantity under procurement and nature of the items. Following provision shall be applicable in all such cases of pre-decided split ordering:

5.2.1 The Purchaser reserves the right to distribute the procurable quantity on one or more than one of the eligible tenderers. Zone of consideration of such eligible tenderers will be the right of the Purchaser. The zone of consideration will be a dynamic mix of inter-se position of firms, supply performance of the firms, quantity being procured critically of and lead time of supply of the item, number of established suppliers, their capacity etc.

5.2.2 Whenever such splitting of the procurable quantity is made, the quantity distribution will depend (in an inverse manner) upon the differential of rates quoted by the tenderers (other aspects i.e adequate capacity – cum-capability, satisfactory past performance of the tenderers, outstanding orders load for the Railway making the procurement, quoted delivery schedule vis-à-vis the delivery schedule incorporated in the tender enquiry etc. being same / similar) in the manner detailed in the table below:

Price differential between L1 and L2	Quantity distribution ratio between L1 and L2
Up to 3%	60 : 40
More than 3% and upto 5%	65 : 35
More than 5% and upto 15%	At least 65% on the L1 tenderer. Quantity distribution will be decided by TC / TAA based on the price differential (i.e) More the price differential more will be the quantity on L1.
More than 15%	No splitting will be done in normal circumstances. However, can be decided by TC / TAA based on the merits of the case.

5.3 If splitting of quantity is required to be done by ordering on tenderers higher than the L2 tenderer, then the quantity distribution proportion amongst the tenderers will be decided by transparent / logical / equity based extrapolation of the model as indicated in Para 5.2.2 above.

5.4 There could be situation when between the lowest firm considered suitable for bulk quantity (L1 firm 'A') i.e. for 65% of NPQ and another firm (L4) considered suitable for bulk quantity order, in between there are firms who are considered suitable only for part quantity i.e. for developmental order, splitting will be done between these two firms.

In such cases, developmental orders shall be given its proportion i.e. out of 35% of the balance NPQ, as detailed below:

(a) L2 and L3 firms will be considered for orders within the overall ceiling of 20 % (of 35% of NPQ) based on the price differential between L2 and L3 firms.

(b) L4 firm (Approved / registered) will get balance quantity.

5.5 In cases of pre-decided splitting, if the purchaser decides not to split the ordered quantity, the reason for the same should be recorded in TC Minutes/Acceptance in direct acceptance cases.

5.6 For cases where the Railways / Production Units has entered into ToT/JV agreements, the following clause should be stipulated as tender conditions:

“As the Railway has entered into ToT/JV agreements withno. of firms, they reserve the right to place orders on all such ToT / JV agreement partners. However for ratio / proportion of quantity distribution among such agreement partners, conditions as detailed in 4.2.2, 4.3 and 4.4 shall apply with the exception that the aspect of per-se reasonability will not be applicable”.

5.7 In the cases of inadequate capacity-cum-capability, dissatisfactory past performance, large quantity of outstanding orders (liquidation of which will take very long time) etc., the Purchaser shall have the right to distribute the procurable quantity amongst tenderers with due consideration to these constraints and in such a manner as would ensure timely supply of materials in requisite quantity to meet the needs of operation, maintenance, safety etc. of the Railways, regardless of inter-se ranking of the tenderers and in a fair and transparent manner with due conformity to the Principle of natural Justice and Equity.

6.0 Supply of Materials

6.1 Risk in the Goods:

As per IRS conditions of contracts **2025** clause 4.1

a) The Contractor shall perform the Contract in all respects in accordance with the terms and conditions thereof. 6.3 Delivery Schedule :

(a) Firms are required to quote in accordance with delivery requirement as per tender. In case of major deviation, their offer is liable to be ignored.

(b) The delivery period quoted by the firm should be very specific and cogent instead of vague terms like 2 to 32 weeks or 2 to 10 months. Such offers will be considered with longest delivery period for the purpose of tender evaluation. Such offers are liable to be ignored in preference to offers with earlier deliveries.

(c) Railway prefers deliveries in installments. Therefore firm should quote supplies in installments, they intend to deliver and with completion date / month, so that contract can be made severable.

(d) Delay & Default by Supplier: If the Contractor fails to deliver the stores or any installment thereof within the period fixed for such delivery in the contract or as extended or at any time repudiates the contract before the expiry of such period the Railway may without prejudice to other rights :-

6.4.Default to supply the material: In case, the tenderer after placement of the purchase order, defaults to supply the material within the delivery date / extended DD, the purchaser reserves the right to initiate action as under :

A. Wherever SD has been taken, in respect of orders, for Safety as well as non-safety items, SD will be forfeited & unsupplied quantity will be procured independently without risk and cost of the original firm / supplier of the defaulted contract. In these cases, adverse performance of the supplier will be recorded and intimated to the approving agencies (i.e RDSO/ PUs/CORE/NSIC etc) wherever applicable, which shall be taken into account in future tender.

B. Notwithstanding anything contained herein the Railway Administration shall be at liberty to forfeit the Security Deposit or recover and adjust from the Security Deposit and other amounts of the Contractor that may be lying with the Railway, any loss suffered on account of the breach of contract arising on account of refusal or failure on the part of the Contractor to perform the contract.

7.0 Inspection Clause :

7.1 Final inspection & acceptance of material will be done by the consignee after its receipt.

7.2 Material to be pre-inspected by RDSO or RITES at Railways option, or as stated in this Tender Enquiry. Tenderers are requested to quote, to quote accordingly. At a later date any request for change in inspection clause will not be considered.

7.3 Material peculiar to Railway such as parts and fittings of rolling stock except raw

material, which have been found rejected during inspection and which could not be rectified, are to be defaced by the inspecting authority to avoid recycling of such rejected material and to avoid ultimate failures of assets. All such rejected materials peculiar to Railways will be mechanically defaced to prevent sale to Railways again.

7.4 In case the firm fails to offer the material for inspection against inspection call issued to inspection agency or if the material have to be re-inspected due to rejection of the material at the firm premises by the inspecting agency or due to non-despatch of material within validity of inspection certificate, then 50% of the inspection charges applicable for the offered quantity subject to maximum of Rs 5,000/- and actual test charges incurred will be paid by the supplier to the inspecting agency.

7.5 For authorized dealers/ Agents the inspection of material will be done at the manufacturers premises only.

7.7 The tenderers to specifically note that :-

7.7.1 In cases where only a portion of the stores ordered is tendered for inspection at the fag of the delivery period and also in cases where inspection is not completed in respect of the portion of the stores tendered for inspection during the delivery period, the purchaser reserves the right to cancel the balance quantity not tendered for inspection within the delivery period fixed in the contract at the risk and expense of the Contractor without any further reference to him. If the stores tendered for inspection during or at the fag end of the delivery period are not found acceptable after carrying out the inspection, the purchaser is entitled to cancel the contract in respect of the same

at the risk and expense of the Contractor. If, however, the stores tendered for inspection are found acceptable, the purchaser may grant an extension of the delivery period subject to the following conditions :-

7.7.1.1 The purchaser has the right to recover from the contractor under the provisions of clause of 7.5 (b) of I.R.S. conditions of Contract 2025 liquidated damages or the difference in rate if the same material is purchased at a cheaper rate (with the consent of the firm)- whichever is higher, on the stores which the contractor has failed to deliver within the period fixed for delivery.

7.7.3 In case where the entire quantity has been tendered for inspection within the delivery period stipulated in the contract and the purchaser choose to grant an extension of the delivery period the same would be subject to the conditions 7.7.1.1. to 7.7.1.4) mentioned in Paragraph 7.7.1 above.

7.8 Operationalization of Engagement of Third-Party Inspection (TPI) agencies

To be attached with all the tenders to ensure compliance of Railway Board instruction as per Annexure 13

8.0 Price Variation Clause :

8.1 Railways, in general, prefer firm price contracts.

8.2. In a tender, where no price variation has been incorporated by the Railway in the tender schedule, tenderers are to quote on firm price basis. Offers with Price Variation Clause in such a tender will be summarily rejected.

8.3. However, there may be cases of procurement of stores, which are raw-material (Steel/ Non-Ferrous) intensive, wherein the tender schedule itself will indicate Price Variation clause along with the PVC formula, generally based on following Price Variation Clauses:-

- a) IEEMA PVC for the items covered by IEEMA formula.
- b) Railway Board's/CORE's PVC for items covered by such formula.
- c) DGS&D's PVC for the items which are covered by such formula etc.
- d) PVC based on prices of HCL, HZL, SAIL, LME, BME etc.
- e) PVC based on WPI
- f) For those items, which are not covered by any of the aforesaid PVC, other PVC specific for such stores (e.g. Import items subject to variation in CD/FE) may be considered , if found to be in order.

8.3.1 In tenders floated with PVC by Railways , tenderers are advised to quote as per specific PV formula given in the tender schedule. **Offers with deviation in the PV formula other than the one as prescribed in the tender schedule will be summarily rejected. Offers from tenderers quoting with fixed price, where Railway has incorporated pre-defined PV formula, will be summarily rejected.**

Sub: Handling of Warranty Rejections

Ref: Railway Board's letter No.2000/RS(G)/379/2 dated 07.08.2015 and 18.01.2018.

Background

Consolidated instructions on handling of warranty rejections were issued vide Railway Board's letter no.2000/RS(G)/379/2 dated 07.08.2015 and 18-01-2018. These instructions primarily stipulate linking of warranty rejections to the concerned supplying stores depot and relevant purchase orders by the user and arrange for warranty replacements duly conducting joint inspections with pre-inspection agency and the firm.

Review of Warranty Management system indicated practical difficulties in efficient handling of several of warranty issues, centralized database, monitoring of warranty settlement, resultant deterrent actions and system improvements. The system of handling warranty rejections is largely manual and whatever computerization is there, it is on separate systems which are not fully equipped to handle warranty rejections end-to-end, and are not integrated. Also, the policy did not cater for many scenarios which are encountered while dealing with the warranty rejections e.g. warranty rejections of components of Rolling Stocks supplied by Private/Govt/Railway units, cases where PO/stores depot/User depot is not linked, epidemic failures, inefficient marking on the items for linking of items to vendor/purchase orders, warranty claims by users, communication of warranty period to end user etc.

Under this background, the consolidated policy instructions on warranty rejection handling including an Online Integrated Warranty Management System over IR, covering entire warranty management landscape to include all types of warranty failures, including epidemic failures, keeping in view practical field conditions for implementation are being issued in this circular. This circular supersedes earlier circulars on the subject.

1. **Digitisation of Warranty Management System**

- i. The entire Warranty Management System shall be digitized and made paperless.
- ii. The existing maintenance Applications viz CMM, FMM, WISE, SLAM, PUs local system, etc. shall be integrated with UDM/ IMMS/IREPS for seamless transfer of required data. A provision shall be made on these platforms to facilitate end users to register warranty complaints. Duplicate feeding on UDM is to be avoided. All systems dealing with warranty rejection of vendor and their response should have provision of uploading/attaching documents.
- iii. Provision shall be made on IREPS for the vendors to input dispatch details such as batch number, serial number, major sub component of the item, date of manufacturing (in MM/YYYY), expiry date (wherever applicable), manufacturer's marking, make/Brand, etc. against the Purchase Orders for each consignee. These details would be passed to IMMS/UDM and reflected in DRR/R-Note/CRN generated on IMMS/UDM and for indicating the same while issuing the materials through Issue Notes. Inspecting Agencies shall also indicate these details explicitly in the Inspection Certificate. End Consignee receiving the material from the vendor will verify these details at the time of receipt of material and explicitly indicate the same in IMMS/UDM.
- iv. Warranty period shall be captured in digital form as stated in Para 4 of this letter.
- v. Centralized Recovery Register shall be digitized & maintained in IPAS and linked with IMMS/UDM for seamless both-ways data flow between these applications for recovery.
- vi. The Warranty Rejections of vendors and their responses shall be linked with Unified Vendor Approval Module (UVAM). Cognizance of these warranty rejections of vendors shall be taken for reviewing the Approval of vendors by vendor approving authorities.
- vii. Cognizance of these warranty rejections of vendors shall be taken by the procuring authorities in deciding the tender cases.

2. Materials are rejected under warranty in the following situations:

- (A) Material rejected was issued to the user (shop/shed etc) from its attached Stores Depot or attached User Depot (both Stock & Non-stock).
- (B) Material rejected was received from a PU or a Stores Depot or a User Depot which is not the attached depot of the end user including that received directly through centralized procurement (both Stock & Non-stock).
- (C) Material was rejected in the field and was fitted at some other Workshop/Shed/Depot. Material either received or fitted through Supply Contract, Works Contract or Service Contract or any other type of contracts (both Stock & Non-stock).
- (D) Failure of components of Rolling Stocks received from Railway PUs/ PSUs/ Workshops/ Private Manufacturers

The Methodology of handling these rejections are dealt with below:

(A) For Warranty rejection in Shop/Shed etc where rejected material was issued from its attached Stores Depot or attached User Depot (both Stock and Non-stock items)-

- i. In case the material was accounted for in Stores Depot in IMMS after receipt from vendor, end-user shall register the warranty complaints with reasons and other details, as required, on the

systems like CMM/FMM/WISE/SLAM/MU etc. available with them & electronically transfer such data to UDM through integrated system or shall register the warranty complaints directly in UDM (as convenient and practical for the end- user) and issue "Advice Note" of returned stores on UDM with the approval of competent authority (Gazetted Officer) to return the rejected material to attached Stores Depot for issuing "Warranty Rejection Advice" (i.e. warranty claims lodging) by attached Stores Depot.

However, in case the material was accounted for in User Depot in UDM after receipt from the vendor, there is no need for issuing "Advice Note" & to return the rejected material to attached Stores Depot.

"Warranty Rejection Advice" (i.e. warranty claims lodging) shall be issued to the firm with the approval of gazetted officer of the end consignee of attached Stores Depot/ User Depot (depending upon where rejected material was accounted for after receipt from vendor) on IMMS/UDM after getting the warranty rejected material from end-user.

Before, issuing the "Warranty Rejection Advice", the concerned user of IMMS/UDM & gazetted officer shall satisfy himself about the availability of the rejected material, correctness of PO (Purchase Order) and applicability of warranty period and ensure that other details including reason(s) for warranty rejection are genuine as per specification, drawing and terms and conditions of the Contract. This should be decided within 15 days.

- ii. Rejected material shall be taken out from the ledger of Stock-Holder in IMMS/UDM (as the case may be). The "Warranty Rejection Advice" shall be issued on IMMS/UDM by attached Stores Depot/ User Depot to all concerned i.e. firm, purchaser, pre-inspecting agency, vendor approving agency, paying authority etc. as per the contract- without fail.
- iii. In the Warranty Rejection Advice, the vendor shall be called upon for replacement of rejected stores or for deposition of equivalent amount of rejected material, within a period of 60 days from the date of Warranty Rejection Advice. Date of issue of Warranty Rejection Advice by gazetted officer to be taken as date of Warranty Rejection Advice.
- iv. It shall be ensured that initiation of warranty complaint by user and issue of Warranty Rejection Advice in UDM/IMMS is not delayed by concerned officials/officers and warranty rejection advice should be issued within 15 days of detection of warranty complaint. However, if the warranty complaint is detected within warranty period, the "Warranty Rejection Advice" must be issued within warranty period.

On issue of "Warranty Rejection Advice", the "Warranty Rejection Register" should automatically get updated.

- v. On getting the "Warranty Rejection Advice", the inspecting agency shall take suitable action against the inspecting officials and ensure necessary corrective actions; duly informing the Officer who has approved the "Warranty Rejection Advice". Recovery of inspection charges from the concerned inspecting agency for the rejected item(s) shall be made by any Bill Paying Authority across IR on pro-rata basis for the quantity and as per the rate of inspection charges for the inspection agency. Claim for recovery of inspection charges against the concerned 3rd party inspecting agency (like RITES etc.) shall automatically get noted into "Centralized Recovery Register" maintained in IPAS on the basis of "Warranty Rejection Advice"; which shall specifically mention the name of inspecting agency. After recovery of inspection charges by any Bill Paying

Authority, "Centralized Recovery Register" w.r.t. recovery of inspection charges to be automatically updated in IPAS to that extent so as to avoid multiple recoveries of inspection charges by different Railways and communicate the recovered amount to iMMS/ UDM.

- vi. Any Bill Paying Authority across IR shall withhold the payment of equivalent amount of rejected material through "Centralized Recovery Register" from firm's Bill(s) at the earliest, till the full amount is withheld and the same shall be released only after disposal/closure/settlement of the warranty claim or deposition of equivalent amount of rejected material or after recovery, whichever is earlier. After withholding of amount by any Bill Paying Authority, "Centralized Recovery Register" to be automatically updated in IPAS to that extent so as to avoid multiple withholdings by different Railways and communicate the withheld amount to iMMS/ UDM.
- vii. Firm shall be allowed to collect the rejected materials only after deposition of payments already made by Railway (if any) to them or after recovery of equivalent amount by Accounts or against replacement quantity. Rejected material should be suitably defaced before handing-over to the firm to avoid re-use and necessary provision about digital capturing in respective modules may be done.
- viii. Warranty Quantity Replacement-
 - a. Replacement of rejected quantity shall be made to the end consignee at the Stores Depot/User Depot which received the original supply from the firm.
 - b. The warranty quantity replacement will be supplied and accounted for in iMMS through R/Note & RO if "Warranty Rejection Advice" has been issued through iMMS. However, where "Warranty Rejection Advice" has been issued through UDM, the warranty quantity replacement will be supplied and accounted for in UDM through CRN. R-Note/CRN should be clearly marked as "Warranty Replacement CRN/R-Note, Not for Payment".
- ix. Replaced/rectified material shall have warranty for the replaced/rectified goods till the original warranty period plus the time from the warranty rejection advice to material replacement/rectification.
- x. Vendor would be permitted to lift the rejected material (subject to clause 2(A)(vii) above) "free of cost" within the period mentioned in Para 2(A)(iii) above. After this time, ground rent shall be applicable.

In cases where firm fails to lift the rejected material within the time period mentioned in para 3203 of IRS Condition of Contract, at the expiry of the period, no claim whatsoever shall lie against the Purchaser in respect of the said goods, which may be disposed of by the Purchaser in such manner as he thinks fit. Without prejudice to the generality of the foregoing, all the provisions in the Indian Railways Standard Conditions of Contract relating to the 'rejection of goods' and 'failure' and 'termination' add and Clause 3100-02 shall apply.

- xi. In case disposal/closure/settlement of the Warranty Rejection Advice is not done by firm within the period of 60 days, Recovery Advice of equivalent amount of rejected material for which Warranty Claim has not been disposed/closed/settled shall be automatically sent from iMMS/UDM (depending upon from where Warranty Rejection Advice has been issued) to IPAS and the "Centralized Recovery Register" of IPAS shall be automatically updated for recovery. If any amount is already withheld against the "Warranty Rejection Advice", the same shall be treated as recovered amount and adjusted accordingly. For balance amount, any Bill Paying Authority across IR shall recover the amount mentioned in "Centralized Recovery Register" from firm's

Bill(s), if any. Paying Authorities should not delay the recovery and ensure recovery expeditiously. Even if the payable amount against a Bill and withheld amount are not enough for the full recovery against a Warranty Claim, the Paying Authority should proceed with partial recovery to the extent of payable amount against that Bill and balance recovery amount will remain in the "Centralized Recovery Register" for further recoveries from other Bill(s).

After recovery, the "Centralized Recovery Register" should be automatically updated immediately to avoid multiple recoveries by different Railways and communicate the recovered amount to IMMS/ UDM.

- xii. Generally, no rejected quantity replacement/rectification should be allowed once recovery has been made by Accounts or the recovery amount has been deposited by vendor. While receiving fresh replacement supplies/allowing Re-inspection/Rectification/Amount deposition by vendor against Warranty Rejection Advice after the period of 60 days, user in IMMS/UDM must ensure that these activities are allowed only to the extent the Claim amount has not been recovered by Railways. Once recovery of the warranty claim amount is made in IPAS/deposition by the firm, user will not be allowed to initiate process of receipt of fresh replacement supplies / Re-inspection / Rectification to the extent recovery of the Warranty Claim amount has been completed in IPAS/deposited by firm against Warranty Rejection Advice.

However, there may be some cases against a Warranty Rejection Advice like:

- a. Fresh replacement supplies have been received before recovery but material taken into Ledger by user after recovery
- b. Re-inspection or Rectification allowed before recovery but material taken into Ledger by user after recovery
- c. Amount deposited by vendor before recovery but details of such deposition entered by user after recovery
- d. Warranty Rejection Advice withdrawn altogether after recovery
- e. Any other incidence like Court /Arbitration Judgement/Order etc. after recovery

In such cases, in all fairness; equivalent amount recovered has to be refunded to the vendor. In case of (a) to (e) above, recovered inspection charges shall also be refunded to the inspection agency.

For such cases, the officer approving the Warranty Rejection Advice, with the approval of his officer next in hierarchy (minimum JA grade officer), can issue "Recovery Refund Letter" on IMMS/UDM on advice of the Stock Holder which shall be visible to all stake-holders including IPAS as well as vendor. Vendor may submit his Supplementary Bill on the basis of "Recovery Refund Letter" to the concerned Paying Authority which has deducted the refundable amount on-line or off-line; depending upon the case whether the Bill against which recovery has been made was submitted on-line or off-line. IPAS will pass-on information of all such refunds against a "Warranty Rejection Advice" to IMMS/UDM so that this information can be made available to all stake-holders. Necessary checks & balances should be provided in IPAS to ensure that vendor is not refunded the recovered amount more than the actual recovered amount or the amount mentioned in "Recovery Refund Letter".

- xiii. **Inspection of Replacement Supply-** In line with IRS Conditions of Contract clause 0703, Vendor shall bear all cost of such replacement including freight, cost of inspection and inspection charges to inspecting agency, if any, on such replacing and replaced stores but without being entitled to any extra payment on that or any other account.

The replacement supply shall normally be inspected by the same inspection agency which inspected and passed the original supply. However, inspection clause for replacement of quantity rejected under warranty can be changed from 3rd Party Inspection (RITES/RDSO etc.) to Consignee Inspection with the approval of minimum JA grade level officer of the office issuing Warranty Rejection Advice, duly considering practicability of the case due to low quantity/value, criticality of the item, quality issues involved etc.

(B) For Warranty rejection in Shop/Shed etc of the material received from a PU or a Stores Depot or User Depot which is not the attached Depot of the end user including that received directly through centralized procurement (both Stock and Non-stock items)-

- i. In such cases it may not be convenient for the end user to either return the material or communicate to the Stores Depot/User Depot (where the account of supply received from vendor was originally made). Thus, in all such cases, the warranty rejected material shall be kept in safe custody of the end user. End User shall register the warranty complaints with reasons and other details, as required, on the system like CMM/FMM/WISE/SLAM/MU etc. available with them and electronically transfer such data to UDM through integrated system or shall register the warranty rejections directly in UDM (as convenient and practical for the end-user). "Warranty Rejection Advice" (i.e. warranty claims lodging) shall be issued to the firm with the approval of gazetted officer of the end user on UDM after linking with PO, R/Note/CRN/Accountal Details.

Before, issuing the "Warranty Rejection Advice", the concerned user of UDM & gazetted officer shall satisfy himself about the availability of the rejected material, correctness of PO and applicability of warranty period and ensure that other details including reason(s) of warranty rejection are genuine as per specification, drawing and terms and conditions of the Contract

- ii. The "Warranty Rejection Advice" shall be issued on UDM by End User to all concerned i.e. firm, purchaser, pre-inspecting agency (if known), vendor approving agency, paying authority etc without fail.
- iii. **Warranty Quantity Replacement-**
- Replacement of rejected quantity shall be made at the end of end user.
 - The warranty quantity replacement will be supplied and accounted for in UDM through CRN. The CRN should be clearly marked as "Warranty Replacement CRN, Not for Payment".
- iv. Other provision shall be as per sub-Para (iii) to (xiv) of Para 2(A) above, except Para (viii) of 2(A)

(C) For Warranty rejections in the field where material rejected was fitted at some other Workshop/Shed/Depot- Material either received or fitted through Supply Contract or Works Contract or Service Contract (both Stock and Non-stock items)-

- i. In such cases it may not be convenient for the end user to either return the material or communicate to the Stores Depot/User Depot (where the account of supply received from vendor was originally made) or to the concerned Workshop where items were fitted.
- ii. Such case shall also be dealt as per Para 2(B) above.

Warranty claim shall be lodged against Rolling Stock supplier.

This shall be same case as 2(B) above except that in case of items appearing in the approved vendor list of vendor approving agencies, information about such cases shall also be shared with vendor approving agencies.

Rolling Stock Supplier shall be the interface between Railway and component supplier. He has to organize the complete warranty settlement. Any action by the component supplier shall be at the specific direction and authority of Rolling Stock supplier.

b. Rolling stock supplied by Railway PUs, Workshop-

In all such cases, the warranty rejected material shall be kept in safe custody of the end user. End User shall register the warranty rejections with reasons of rejection and other details, as required, on the system like CMM/FMM/WISE/SLAM/MU etc. available with them & transfer such data to UDM or shall register the warranty rejections directly in UDM (as convenient and practical for the end- user).

Simultaneously, the Railway PU/Workshop shall raise the warranty claim by issuing "Warranty Rejection Advice" on UDM on concerned component manufacturer/supplier separately from their end as per the process detailed in Para 2(B) above.

3. Rectification of the rejected stores-

- i. In case the vendor requests for rectification/repair of rejected stores in terms of Para 2, rectification/repair to be permitted in exceptional circumstances and only if the item can be effectively rectified/repared at the user end and with specific prior approval of the officer next in hierarchy (minimum JA grade officer) to the gazetted officer issuing Warranty Rejection Advice. At the option of the Depot Officer/ officer of end-user (depending upon who has issued the "Warranty Rejection Advice"), rectification/repair of rejected stores by the firm shall be permitted within railway premises only.
- ii. If firm requests to rectify/repair the rejected stores at its own premises, same shall be allowed only if the item has unique traceability to ensure that the rejected item cannot be supplied to any other consignee/user and if supplied, it can be traced. For taking out the rejected quantity for rectification/repair, equivalent value of rejected item shall be deposited by the firm.
- iii. However, the rectification activity shall have to be completed within timelines given in sub-Para iii of case 2(A) from the date of issue of "Warranty Rejection Advice." After this, process for recovery shall be initiated.

4. Linking the rejected stores with PO, R/note, warranty period etc –

- i. Marking of stores has been mandated as per Clauses 1103, 1302, and 2704 of IRS Condition of Contract, which must be ensured.

- ii. Specification/drawing of the item should include conditions for marking of the item for establishing unique traceability of the item, accountability and performance monitoring of the item/supplier. Marking should be with manufacturer's name, lot/batch number, serial number, month and year of manufacture (in MM/YY format). If possible, Railways' purchase order number and date, consignee code, suppliers' IREPS vendor code and warranty period in number of months may also be included to have complete traceability. Drawing/specification must specifically indicate the types of acceptable marking mechanism/method. Marking method selection should be based on factors like item function, item geometry, type of surface, item size, operating environment, age/ life, criticality, cost, etc. Marking method prescribed in the drawing/specification should be good enough to ensure that unique traceability is possible for the lifecycle of the product and if not possible, at least up to the warranty period of the item.
- iii. Direct Part Marking (DPM) for items shall be done based upon the criticality/cost/feasibility to have DPM of the item. The criticality/cost/feasibility shall be decided by the concerned Railway Board Directorates depending upon the nature of the item or/and its end use. This scheme will help in pin-pointing the responsibility, shall improve traceability, accountability and performance monitoring of the item and that of the supplier. Part Marking should be part of specification and should at least indicate manufacturer's name, lot/batch/item No., month, and year of manufacture in MM/YY format. If possible, Purchase Order number and date, consignee code, IREPS vendor code and warranty period in number of months may also be included. It shall be responsibility of the firm to develop a unique coding scheme/mechanism for ensuring traceability of its product. The firm shall intimate the same to the purchaser at the time of supply. In case it is not possible to have these details as part marking on the item, alternate marking scheme and its implementation may be decided by the concerned Directorates.
- iv. Onus of marking and traceability as per purchase order shall be on vendor
- v. The record of fitment of item shall be captured digitally on UDM and/or other applications / Maintenance Modules like CMM/FMM/SLAM/WISE/MU etc.
- vi. Capturing Warranty Period digitally in unambiguous terms:
 - a. In terms of RB letter No. 78/RS(G)/777/1 dated 07/05/2004:
 - (i) Warranty Clause specified in the tenders should normally be same as that in IRS conditions of contract.
 - (ii) Wherever it is considered necessary to have Warranty Clause in technical specifications at variance with Warranty Clause in IRS conditions of contract, then technical department, while submitting the indents, and while providing the specifications, will advise clearly about applicable Warranty Clause for procurement to avoid problems at post contract stage.
 - (iii) While procuring the material, it should be ensured that the applicable Warranty Clause is specified in tender documents clearly and in unambiguous terms.
 - b. Warranty clause if at variance with IRS conditions of contract shall be a specific clause in the tender/PO and shall supersede warranty clause of IRS conditions of contract.

Else it should be mentioned in tender conditions that warranty as per IRS conditions of contract is applicable. Both should never be included in the tender.

- c. A field of Warranty period for the item under procurement may also be indicated on IREPS while floating tender for the same
 - d. Data of warranty period should be captured in digital form in terms of number of months and should get reflected in tender, contract, Inspection Certificate and R/Note in digital form and should be known to the end-user.
 - e. During inspection/receipt of the item, inspecting Agency and material accepting authority shall ensure marking as per purchase order.
-
- vii. While issuing the stores, "Issue Note" should be linked with warranty period in months, RO number, PO number/date and Depot Code as well, so that supply details and exact warranty period is known to consignee/end user.
 - viii. IMMS and UDM systems should be able to provide the complete supply details i.e. PO No./Date, Vendor Name, Challan No./Date, warranty period etc. for the consignment to be rejected.
 - ix. Online provision shall be made for entering the complete details of item as per Para 1 (iii) above by the vendor at the time of dispatch and that should be captured on iMMS/UDM while accepting the material.
5. All efforts should be made to link the warranty rejected item with P.O. However, if it is not possible to link the PO, warranty period mentioned in drawing/specification shall be taken into consideration or if not mentioned therein, it shall be as per IRS conditions of Contract. In such cases the warranty period shall be applicable from the end of month next to manufacturing month mentioned on material (assuming that stores are supplied after inspection after 30/45 days from the actual date of manufacture).
- 5.1 The Warranty settlement in such cases shall be as per para 2(B) above, except following-
- a. As PO details shall not be available, details of PO, R Note, CRN etc may not be included in Warranty Rejection Advice and other communications.
 - b. The value of rejected materials shall be decided on the basis of rate of component as per latest PO available.
 - c. If Inspecting Agency of the rejected store is not known, warranty rejection advice shall not be sent to inspecting agency and para 2(A)(v) shall not be applicable.
 - d. If Inspecting Agency of the rejected store is not known, the inspecting agency for the replacement supplies shall generally be as per the inspection policy followed for normal procurement or as per Para 2 (A-xiii) above.
6. **Authority to adjudicate the disputed warranty cases and authority to decide appeal-**
- i. For all warranty rejection cases, the controlling officer of minimum JAG level of the office issuing 'Warranty Rejection Advice' shall be adjudicating the disputed cases. His decision shall be binding on all the parties.

- ii. All the disputes, legal matters, etc. arising out of warranty claim shall be handled directly by the office issuing the "Warranty Rejection Advice".

7. Handling Epidemic Failures-

Any recurring/large scale rejections from a particular lot will lead to epidemic failure.

- i. Whenever the quantity rejected anytime during the warranty period exceeds 5% of the total supplied lot against a particular contract, it will be considered as Epidemic Failure. However, in case of failures related to items which are extremely critical from safety consideration (like critical components or sub-parts of air brake system, wheel discs, axles, propulsion system etc.), RDSO/PU may pre-define a lower percentage for considering the occurrence of epidemic failure. This condition should be declared in the tender document for procurement of such items.
 - ii. Same steps as mentioned at para 2, as applicable, to be followed. However, instead of rejecting only defected quantity, entire lot should be rejected. Even if some quantity of such lot has been used/fitted, the same may also be identified and called back from service, to the extent possible, by the concerned technical department for issuing warranty rejection.
 - iii. Joint Inspection shall be conducted as per extant provisions.
 - iv. In case warranty rejection is established in joint inspection, the vendor shall replace entire lot (as available, refer point ii above) duly inspected by inspecting agency as per contract on his own expenses.
 - v. Replacement supply should be inspected by the same agency which has previously inspected the supplies.
 - vi. Epidemic failure is essentially considered as very poor quality performance and should be reflected on the performance of vendor/Inspecting agency accordingly.
 - vii. Concerned Inspection /Quality monitoring/Vendor approving agencies should conduct root cause/failure analysis of the failure and QAP of vendor shall have to be re-validated. They should also suggest improvement in inspection methodology/Quality Assurance Plan to avoid failures.
8. In case the vendor disputes the Warranty Rejection as per Warranty Rejection Advice, representation from vendor should be sent through IREPS system to the officer issuing Warranty Rejection Advice within 7 days from the issue of Warranty Rejection Advice. In such case a joint inspection shall be organised by the officer issuing Warranty Rejection Advice for the grounds of warranty rejections mentioned in the Warranty Rejection Advice.
9. In all cases of warranty rejections where items are appearing in the approved vendor list of vendor approving agencies, information about such cases shall also be shared with vendor approving agency as per Para 1 (vi) above for performance monitoring and capability/capacity assessment/delisting/down gradation of the vendor and review of the design/specifications/STR if required. If required, based on merit of the case, Vendor approving agencies may take appropriate decision on suspension of inspection

10. Data of the warranty rejections shall be analysed item-wise and vendor-wise by the Quality monitoring/vendor approving agency to identify the areas for improvements in systems, processes and design/specification.
11. The recovered amount from the vendor should be credited in the same allocation of the end use in which the item was originally procured.
12. Since complete process is being considered for digitisation, procurements (including Railway Board procurements) which are not being done through iMMS, should also be done through iMMS and Contracts issued through iMMS.

For ease of understanding, a sample flow chart for case 2(A) is enclosed. Other cases (Case 2(B) to 2(D)) involve only minor modifications of the same. In case of any difference between this circular paras and flow chart, the circular para shall prevail.
