

SPECIFICATION

For Irrigation Projects

CHAPTER – 25

**Section – V of Volume III of Specification for
Irrigation Projects (Dec. 1995)**

LINING OF CANALS with CEMENT CONCRETE

LINING OF CANALS

CONTENTS

Item No.	Contents	Page Nos.
25.1	Lining of canal	25-1
25.2	Terminology	25-1
25.3	Preparation of Subgrade	25-2
25.3.1	Expansive soil	25-2
25.3.2	Preparation of Subgrade Consisting of soil	25-10
25.3.3	Anti Salt Treatment	25-11
25.3.4	Reaches Consisting of Rock	25-11
25.4	Under Drainage of Lined Canals	25-12
25.4.1	General	25-12
25.4.2	Methods of Under Drainage	25-12
25.4.3	Pressure Relief Valve (PRV)	25-13
25.4.4.	Longitudinal and Transverse drains	25-18
25.4.5	Under Drainage for Clayey Subgrade	25-20
25.4.6	Under Drainage for CNS Materials	25-20
25.5	Use of Polyethylene Film Under Rigid surface lining of soil cover	25-20
25.5.1	General	25-20
25.5.2	Film	25-20
25.5.3	Preparation of Subgrade	25-21
25.5.4	Laying Technique	25-21
25.5.5	Top Cover	25-24
25.6	Cast insitu Cement Concrete Lining	25-24
25.6.1	Cement Concrete	25-24
25.6.2	Preparation of Subgrade	25-24
25.6.3	Laying of Concrete Lining	25-25
25.6.4	Joints	25-29
25.6.5	Safety Ladders	25-30
25.7	Clearing site	25-32
25.8	Trimming the Canal section and preparation of subgrade for concrete lining	25-32
25.9	Cast in situ Concrete lining	25-33
25.10	Curing	25-34
25.11	Test concrete and acceptance of work	25-36
25.12	Joints	25-37
25.13	Tolerance	25-37
25.14	Dewatering	25-37
25.15	Measurement and Payment	25-38
25.16	Safety ladders	25-38
25.17	Pressure Relief valves	25-38
25.18	Insertion of PVC crank including joints	25-38
25.19	Strip Drain and under drainage arrangements	25-40
